PROFESSIONAL SUMMARY

Networking and Communications Engineering student with practical experience in data entry, Excel data cleaning, document processing, technical support, and customer service. Builds practical Python and automation learning projects and is developing skills in SQL, cloud computing, and data engineering. Seeking data-focused administrative, Excel, junior automation, and entry-level technical opportunities in the UAE.

WORK EXPERIENCE

Data Entry Assistant

May 2023 - August 2024

Computer / Data Entry Center

- Entered and organized information using Microsoft Excel and Word.
- Converted handwritten documents, PDFs, and images into structured digital records.
- Reviewed records for missing values, errors, and inconsistencies; corrected and formatted information for accuracy and readability.
- Organized files, worked carefully with large amounts of information, and maintained confidentiality.

Technician & Technical Support Assistant

2023 - 2024

Electronics Repair Center

- Assisted with laptop and smartphone troubleshooting, basic hardware and software diagnosis, software installation, and device setup.
- Explained technical problems to customers and maintained organized service information.

Cashier

Previous part-time experience

Supermarket

- Processed cash transactions accurately, assisted customers, and maintained attention to detail while working under pressure.

EDUCATION

Networking & Communications Engineering

2024 - 2028 expected

Higher Institute of Engineering, Egypt

- Relevant study: networking, communications, programming, electronics, circuits, mathematics, physics, logic design, and technical problem-solving.

High School Diploma

2024

Ajman Private School, UAE | Final grade: 95.16%

SELECTED PROJECTS

Excel Employee Data Cleaning

Cleaned and standardized sample employee records, reviewed duplicates and inconsistent values, improved formatting, and documented before-and-after results.

CSV Batch Conversion & Excel Template Automation

Processed five CSV files into five required Excel outputs with validation, transformation, error tracking, and zero failures.

CV-to-Remote-Job Matching - Documented Prototype

Documented an n8n workflow concept for extracting CV keywords, collecting jobs, assigning 1-10 suitability scores, and organizing results in Google Sheets.

Python Inventory & Student Systems

Built menu-driven learning applications using functions, dictionaries, loops, conditions, calculations, and input validation.

SKILLS

Data & office: Microsoft Excel, data entry, data cleaning, formatting, validation, duplicate review, spreadsheet organization, Google Sheets, Microsoft Word, PowerPoint, Outlook, document processing, PDF/image conversion, file organization, internet research, and confidential information handling.

Programming & technical - foundational: Python fundamentals, functions, dictionaries, lists, loops, conditions, exception handling, text files, input validation, command-line applications, basic data processing, Git, GitHub, GitHub Pages, Visual Studio Code, n8n fundamentals, basic workflow automation, computer troubleshooting, and networking fundamentals.

Currently learning: Python, SQL, advanced Excel, cloud foundations, databases, data modeling, ETL, data pipelines, and cloud data engineering.

LANGUAGES

Arabic: Native | English: B2 / Intermediate
